Institut Mines-Telecom Business School retains its place among elite schools with AMBA re-accreditation

Institut Mines-Telecom Business School has officially received re-accreditation from the Association of MBAs (AMBA), one of the world's leading authorities on post-graduate business education, demonstrating its continuing commitment to excellence in management education.

Accreditation from the Association of MBAs (AMBA) represents the highest standard of achievement in post-graduate business education. Its rigorous assessment criteria ensure that only the highest-calibre programmes which demonstrate the best standards in teaching, curriculum, and student interaction achieve Association of MBAs accreditation.

Institut Mines-Telecom Business School is a well-know institution primarily based in Evry, France. It is the only French Business School situated within a broader public technology institute, specialised in dedicated engineering and managerial elements of the digital turn.

Members of AMBA's visiting accreditation panel, representing senior management at AMBA-accredited Business Schools globally, commended the widening participation strategy of the School. This was exemplified by the low fees and the wide range of scholarships which were mentioned as a key strength of the School not only in enabling recruitment but in providing a positive and diverse student learning experience.

The panel also commented on the very supportive and engaged network of employers, who spoke very positively about their engagement with the School and the quality of the graduates that they hire. The panel noted the start-up incubator demonstrated the school's commitment to entrepreneurship and the success of this could be seen in the companies and jobs created through it.

'We are honoured with this re-accreditation by AMBA,' said **Denis Guibard, Dean of Institut Mines-Telecom Business School. '**It shows the quality of our education, and our commitment to international standards and to continuous improvement. We are proud to deliver a unique Grande Ecole Master in Management, guided by strong values around responsibility and openness, and articulated around digital disruption and innovation management. Our social openness and the outstanding employability of our alumni brings us pride every day.'

The accreditation is international in scope and reach, and AMBA works under the belief that accredited programmes should be of the highest standard and reflect changing trends and innovation in post-graduate management education. Its accreditation process reflects this commitment to fostering innovation, and demanding Business Schools to perform at the highest level continually.

Andrew Main Wilson, Chief Executive of AMBA & BGA, said: 'AMBA only accredits the top 2% of Business Schools globally, I am delighted that Institut Mines-Telecom Business School continues to be part of this select group.'

About Institut Mines-Télécom Business School

https://www.imt-bs.eu/en/

A public, socially inclusive, higher education institution, Institut Mines-Telecom Business School trains future managers and entrepreneurs to be responsible, innovative and open to the world around them, and to lead their organizations in the major transformations of tomorrow's society: digitalized economy, energy and ecological transition, new business models and industry of the future. Leveraging its research and education programs, its support of innovation and entrepreneurship, its close relationship with business and its engagement within its territory, the School aims for excellence in contributing to economic development both nationally and locally, while creating value for all its stakeholders.

School was founded in 1979 as part of Institut National des Telecommunications together with its sister engineering school Telecom SudParis, with which it shares its large campus. It remains under the authority of French Ministry of Economy and Industry, and trains 1,500 students each year.

About AMBA & BGA

Spearheading excellence and trailblazing innovation, for more than 50 years the Association of MBAs (AMBA) has been the impartial authority on post-graduate management education. AMBA established that vision in 1967 and, in a volatile, uncertain world, it's as relevant today as it was then. We are committed to raising the profile and quality standards of business education internationally, for the benefit of Business Schools, students and alumni, employers, communities and society.

- Our accreditation service is the global standard for all MBA, DBA and master's degrees, currently accrediting programmes from the top 2% of Business Schools in more than 75 countries.
- Our Research and Insight Centre produces a rich body of reports exploring global trends in the business education sector. This drives our global thought leadership and public affairs campaigns.
- We are the only professional membership association that connects MBA students and graduates, accredited Business Schools and MBA employers throughout the world.
- Through our members, AMBA is building an international force for good, championing best practice, responsible management and sustainability. Membership to AMBA means being part of an international community of peers with access to business strategy thought leadership, career advice and knowledge, and an MBA jobs portal.

- Our multi-award-winning events offer networking opportunities online and in person across all continents in association with international corporate partners and thought leaders exclusively for our members and accredited Business Schools.
  The Business Graduates Association (BGA) is an international membership and accreditation body of world-leading and high-potential Business Schools that share a commitment for responsible management practices and lifelong learning, and that are looking to provide a positive impact on their students, communities and the economy as a whole. We offer:
- Quality assurance services to Business Schools and similar institutions, aimed at continuous improvement and positive impact to increase a Business School's credibility and influence.
- Consultation and mentorship services to Business Schools to improve their marketing and admissions, programme design, alumni interaction, teaching methods, and career development services.
- Award-winning international events for Business School professionals, focused on continuous learning.
- Student and graduate membership, which includes social networking events worldwide, professional development tools, a Career Development Centre, and much more.
- Leading and award-winning content on responsible management, professional and personal growth, and influence via the Business Impact content hub.
